

Help me test SongLab.

Record-crafting software that teaches you how the pros build records — then hands you the technique to use on your own song. It coaches; you create.

Open SongLab songlab-mvp.onrender.com

Takes ~5–10 minutes · no account · you can't break anything that matters, so poke around hard. First load can take ~30–50s to wake up (free server having a nap).

BEFORE YOU START

So you know what's normal

- Best on a laptop/desktop browser for now — mobile works but is rougher.
- First load is slow (cold start). Quick after that.
- The "AI Analyst" is intentionally basic right now — that part's coming.
- No login; your work lives in your browser only.

THE WALKTHROUGH

1

1 MIN

Set your lane

Left sidebar → **Mode:** Songwriter · **Level:** Starter · **Genre:** pick any (e.g. R&B).

Expect A short, calm menu (~4 rooms), and the whole app re-tints to your genre.

Tell me: Did "Starter" feel welcoming or too bare? Was Mode-vs-Level clear?

2

3 MIN · THE CORE IDEA

Steal a move

Pro Playbook → pick a producer → scroll to "**Steal this move**" → read steps 1–2 → in **step 3**, write your own version in the box → **Add to my bag** → open **Reference Vault**.

Expect It never writes the lyric for you — your own words get saved.

Tell me: *Did it feel like it was teaching you, not doing it for you? Was the "now you try" prompt doable?*

3

1 MIN

Watch it grow

Change **Level**: Starter → Standard → Deep.

Expect More rooms unlock in the menu as the level rises.

Tell me: *Does "the app grows with your skill" make sense — useful or gimmicky?*

4

2 MIN

Diagnose a song

Song Doctor → make up a title / concept / hook, set the sliders → **Run Diagnosis**.

Expect A score + a specific "first fix" + weak / watch areas.

Tell me: *Was the feedback specific enough to act on? Did the verdict feel fair?*

5

2 MIN

Explore the craft library

Browse **Case Studies**, **Session Greats**, and the **Glossary**.

Tell me: *Did anything teach you something new? Anything you wanted explained that wasn't?*

6

OPTIONAL

Audio Lab

Open **Audio Lab** → **Demo Groove** or upload a beat → try the loop + markers.

Tell me: *Did playback / looping work? Anything confusing?*

WHEN YOU'RE DONE

What to send back

Even a line or two helps.

BUGS

What broke, which page, what you'd just done.

CONFUSION

Where you got lost or stuck.

WISHLIST

What you wanted that wasn't there.

WHAT CLICKED

Anything that genuinely landed.

Quick ratings (1–5): **Clear to use** __ · **Useful for songwriting** __ · **Would return** __

KNOWN LIMITATIONS

No need to report these

AI analysis is basic

audio transcription off

mobile is rough

"My Catalog" not built yet

first load is slow

Send feedback: your LinkedIn DMs, a comment on the post, or wherever you like.

Thanks for helping shape it.

SONGLAB — AUGMENT CREATIVITY, DON'T REPLACE IT
